EA 854
Studio Interface

PRODUCT INFORMATION

The EA854 is a stand alone headphone amplifier with extra facilities for use in e.g. a presenter booth. Interfacing is possible from the control room via-multi way connector and cable, carrying DC control and audio input signals.

This unit can also be used in combination with most EA On Air Mixing Consoles like the D3, D4 SRM, S130, S340 and S440. The unit has six separate adjustable headphone outputs, two high-level loudspeaker outputs and a low noise COUGH button with MIC ON signalling. Separate inputs for 2 presenters and guest allow talk-back signals only to be heard by the presenter(s).

Please contact your local EA dealer for more information about Eela Audio products.
