

### **S130 On Air Facilities in short**

- Availability of 6U wide Script Space
- Split Frame option
- Full communication paths for presenter and guests
- Private talkback circuit for Presenter
- Red light signalling tallies for the Studio
- Online control for cough and headphone level control in combination with the **EA853 Studio Interface**
- Two extra MIC On indicators added in meterpanel EA609
- Additional PFL On indicator in meterpanel

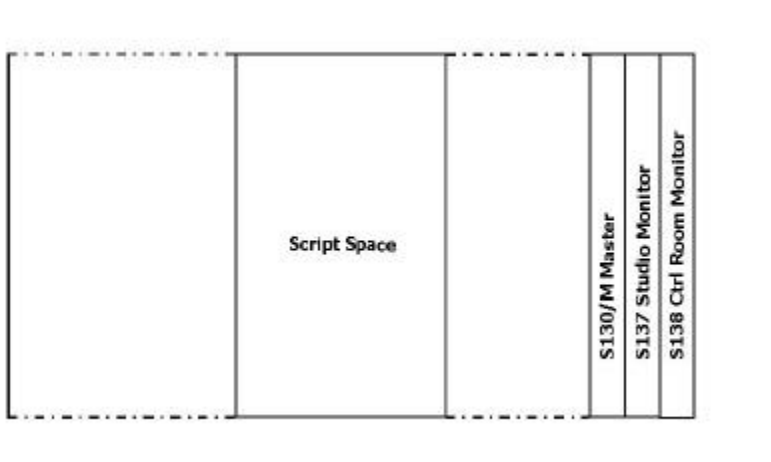

### **S137 configuration requirements**

For straight frame without Script Space: **channels - S130/1(blank) - S130M - S137 - S138**

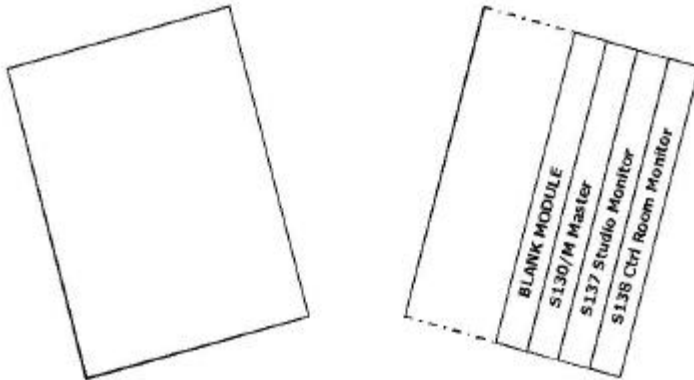

For straight frame with Script Space: **channels - S130M - S137 - S138**

For Split frame:

**channels - S130/1(blank) - S130M - S137 - S138**

The requirements are equal to the S340 and S440 series.

The S130M is introduced as being the Master, having the following functionality:

- Main Stereo output (nominal level, electronically balanced)
- Mono derived output at +4 dB
- No compressor/limiter
- Fixed level outputs (at +6 dB): AUX1,2,3 / REC / SEND

Together with the S130M, a blank module OR Script Space is needed for housing the Printed Circuit Boards.

### ***Description for Studio Monitor S137***

The same sources as for the control room monitor can be selected to the outputs for studio loudspeakers, guest and presenter headphones. With no studio microphones live, talkback to studio is routed to all outputs with dimming of the standing signal.

Red light signalling tallies for the Studio are provided and online control for Cough and Headphone level control for max. 4 guests is available through the (optional) **EA 853 studio interface unit**.

### ***Turnkey Solution with S130 On Air console***

Added to the existing Turnkey set-ups is a configuration with a basic S130 On Air mixing console. This Solution provides all necessary source equipment, cabling and other units to setup a studio, without having to worry about connectors, cables or furniture.
